Not once, but **twice the space saving!**

Do you not only want to save space during use, but also before and after? Then choose one of our collapsible column carts: the solution for catering companies, space challenged businesses and rental. These models can be easily folded after use and hang on the wall or put in a corner for storage. This gives you maximum enjoyment of your PlateMate in a minimal space.

The collapsible PlateMate is maintenance-free, made of durable stainless steel tubing and equipped with sturdy casters (two with brakes). It comes in four different sizes: for 48, 60, 78 or 84 plates. They can be used in any situation.

PlateMate 84, el carro estándar

La pieza básica de nuestra colección es el carro PlateMate 84. Un carro muy solicitado para su uso en restaurantes, cocinas industriales y barcos. Apile de forma sencilla y rápida 84 platos con platos preparados o semielaborados y, al mismo tiempo, ahorre el máximo espacio. Fácil de manejar por una sola persona, sin que un escalón o un umbral sean obstáculo. Se puede guardar perfectamente en cámaras o en armarios calientes para servir después, de forma sencilla, desde el mismo PlateMate. Un ahorro de tiempo y de dinero. ¡Una forma estupenda de facilitar el trabajo en la cocina!

Binnen zonder **bukken!**

Often, the entrance to a cooler or storeroom is just too low for a standard PlateMate (or any other mobile storage tower). Also in some spaces with low ceilings, a maximum height can play a role. For that reason, we have cleverly adapted the popular PlateMate 84 for use in slightly lower spaces. The trusted 84-column principle remains the same, but it is mounted lower in the frame, decreasing the height to under 180cm. So this particular type is not only a winner in terms of floor space, but also in height!

110 TR 84 Deep Trolley

Product code:	PM 84 lke
Capacity:	84 plates

Place quality on the table!

For practical use on tables and buffets, Plate-Mate offers you a range of handy tabletop models. The series consists of four sizes: 12, 24, 36 or 48 plates. In terms of construction, components and quality, the table models are derived from their larger brothers. They also feature an elegant plastic pedestal (for 12 plates) or four solid adjustable feet (for 24 plates) that can deal with any unevenness in the surface.

The tabletop models have a hanging loop so you can hang them on a hook, for example in a cold room. Upon request, we can equip our table models with a handle and casters (with brakes), to allow easy manoeuvrability. And by means of a separately available wall mount, you can turn a tabletop model into a wall-mounted one; The Plate-Mate can still turn!

Twice as big, twice as useful

Do you want to be able to stack and move your plates in one easy action? Then the PlateMate Twin is ideal for you. This model consists of a single frame with two separate columns, which can rotate independently of each other and can hold plates up to 38 cm in diameter.

The PlateMate Twin is maintenance-free and equipped with sturdy casters (two with safe brakes). The frame is made of durable stainless steel, the two columns from aluminium and plastic. You can choose from three sizes: 96, 120 or 168 plates. Whichever PlateMate Twin suits you best, you are always getting the ultimate in convenience and efficiency.

On the wall and **out of the way!**

Do you have a (very) small kitchen and therefore very limited space? Then the compact wall-mounted PlateMate could be just what you need. It comes in six sizes: for 6, 9, 12, 18, 21 or 48 plates. It will fit somewhere in your kitchen.

The wall models can be mounted fixed to the wall, or hung 'loose' on a separate wall bracket. In that case, you can use them both on the wall and on the table. The PlateMate can therefore be used in cafeterias, buffets and for rapid deployment of plates. They are so compact, that the 'loose' variant can even be cleaned in the dishwasher!
