## *The Sous Vide Process*

Sir Benjamin Thompson, Count Rumford was the first to describe low-temperature cooking in 1799. The benefits of the procedure were recognized in France in the mid 1960s and used to reduce food shrinkage. Today, star chefs all over the world apply this technique because of its numerous advantages.

When applying Sous Vide, which translates as “under vacuum”, fresh food such as fish, meat or vegetables are vacuum-packed and then cooked in precisely temperature-controlled water.

**Cooking Sous Vide yields healthy and nutritious dishes with high-quality taste, preserving aroma, flavor, and vitamins.**

The Sous Vide technique facilitates the preparation of nutritionally healthy and vitamin-rich foods. When using conventional cooking methods vitamins and flavors are released into the water or the air. However, when using the Sous Vide method the fresh food is vacuumed and all vitamins, nutrients and flavors remain concentrated in the food. This ensures a more intense taste.

Freshness, color and appearance remain unaltered until consumption.

## *Advantages*

- Consistent results
- Concentration of flavor
- Stress-free and efficient cooking
- Minimal shrinkage
- Reproducible and precise
- Overcooking virtually impossible
- The meals wait for the guest - not vice versa
- Extended shelf life without loss of quality
- Low energy costs
- More profitable

# SOUS VIDE

“We worked hard with the *fusionchef* immersion circulator and in doing so we were able to test its endurance and precision. Lots of chefs know the advantages of Sous Vide cooking: the anticipation during the cooking process, the reduction of costs, the saving of time, the rationalization of work and the extended storage life of foods under consideration of its organoleptic quality – the *fusionchef* circulator meets all requirements. The circulator can easily be transported and needs only limited space when used in the kitchen. For our kitchen the unit became an essential tool.”

Quique Dacosta | Chef | El Poblet | Spain

## Functionality

### 1) Preparation

Use only the freshest and best ingredients. Prepare the raw, uncooked food.

### 2) Vacuuming

Place the raw, chilled ingredients in bags suited for Sous Vide cooking and seal them using a vacuum packing machine.

### 3) Cooking

Fill the bath tank with hot water and heat it to the desired temperature using your *fusionchef* unit. When the desired temperature is reached, place the bag containing the product into the water bath. Always cook gently at low temperatures, but for a longer period of time. If you do not have experience regarding cooking times and temperatures, be sure to consult a Sous Vide cookbook.

### 4) Cool

If you do not serve the cooked product immediately after cooking, you can cool it and place it in chilled storage. Cool the pasteurized product after cooking to 3 °C within 90 minutes. This can be done in a bath of ice water or a shock freezer.

### 5) Chilled storage

Remove the cooled bag from the ice water or shock freezer and store the product at a maximum of 3 °C.

### 6) Regenerate

Heat the cooled bags in the water bath just before serving.

### 7) Searing

Sear the food just before serving. The food develops its fresh flavor once more (Maillard reaction).

### 8) Serve & enjoy

## Pearl

**Pearl**

*Pearl* guarantees a temperature stability of  $\pm 0.03$  °C in vessels or cooking pots up to 58 liters. The integrated safety protection grid prevents the vacuum pouch from touching the heating coil, pump and float. The strong circulating pump ensures optimum temperature stability and even distribution of water in the bath. This expedites the heat-up times when chilled pouches of foods are put into the bath.

The integrated timer allows for easy monitoring of the remaining cooking time.

In addition *Pearl* features an integrated vapor barrier protection, a warning system for low water level and splash water protection according to IPX4, which ensures safe operation.

The hygienic smudge-proof stainless steel hood and the extra bright display provide a modern and suitable design for your kitchen.

## Diamond

**Diamond**

*Diamond* has all of the features that make *Pearl* so special plus additional innovative functions such as pre-programmed memory keys for meat, fish, and vegetables, as well as straightforward HACCP data logging and calibration functions.

When used in conjunction with the core temperature sensor, *Diamond* emits an alarm to indicate that the selected core temperature has been reached. The *Easy fusionchef* software gives you the ability to control, visualize, and log HACCP-relevant data for up to 24 *Diamond* units simultaneously.

The timers can be started separately from each other so you always stay in control, even during hectic situations. The timer that will expire next is shown continuously. A visual and acoustic signal informs the chef when the desired time has passed. The timer then goes into the minus range so you always know the total time that the food has been cooking.

The technical data of *Pearl* & *Diamond*, images and functions can be found at [www.fusionchef.de](http://www.fusionchef.de)

## Miral Duck Breast with Purée of Beetroot, Pear and Chard

from Heiko Antoniewicz

Seal the duck breast together with the mugwort and poach at 62 °C for 20 minutes in the **fusionchef** water bath, remove and sear skin until crisp. Cut into equal pieces. Reduce jus to desired consistency and let the coffee beans steep for 5 minutes, strain and thicken with a bit of arrowroot flour.

Boil the beetroot in strongly salted water with cumin and vinegar until soft, peel while warm and cut into 3 mm dice. If desired, glaze in butter. Finely puree the warm trimmings of the beetroot with poultry stock in a mixer and season well.

Bring the white wine together with sugar and spices to a boil, set aside for a while and bring it to a boil once more. Thicken slightly with Xanthazon. Cut the pear into equal slices, pit and turn into decorative shapes and poach them in the boiling. Steam the chard in the butter and season well.

Cut and arrange the duck breast. Arrange the beetroot dice. Apply the puree and place the pear slices. Garnish with flaked almonds and plate the chard. Crown with coffee jus and serve.

This recipe was generously provided by Heiko Antoniewicz. For further recipes see [www.fusionchef.de](http://www.fusionchef.de).

"I have worked with several different models and suppliers for circulators and I am shopping no more! This circulator is perfectly adapted for the type of dishes I need to produce at Mozaic and it is also perfect for the demos we conduct in our cooking school. It is small enough to offer mobility yet extremely powerful. The major difference with other products for me resides in the precision and sensitivity of the thermostat. A crucial element if perfection wants to be achieved. I highly recommend the *Diamond M* by **fusionchef** and I will not use any other brand."
